Australia's #1 Certified Rubber Mulch Supplier

EQUESTRIAN RUBBER MULCH

Enduro Rubber Mulch
is Certified & Meets
Australian Standards

EQUESTRIAN

✓ increases training time

✓ minimizes injury

✓ reduces stress

✓ improves footing

✓ non-abrasive

✓ reduces dust

✓ does not break down

✓ environmentally friendly

✓ non toxic

✓ 100% tyre recycling

✓ will not ignite

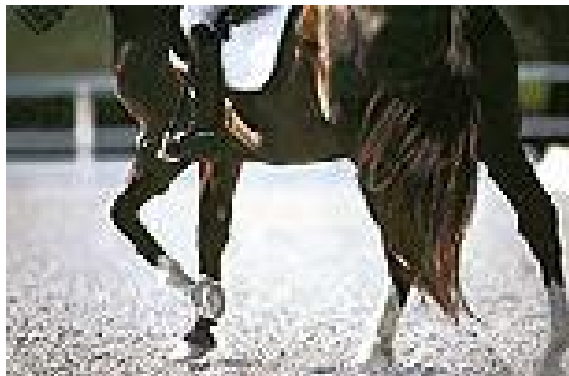

✓ minimum maintenance

✓ wind resistant

✓ cost effective, apply *once* only

✓ Meets Australian Standards

✓ Excellent returns

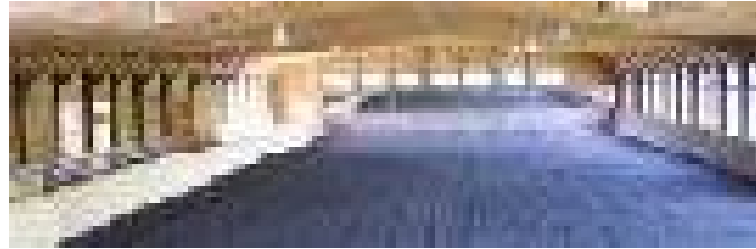

✓ Comes in color

✓ Scientifically Tested (available)

HC OBSIDIAN SILK

EQUESTRIAN

MANY ARENA OWNERS ARE NOW TURNING TO ENDURO EQUESTRIAN RUBBER MULCH TO HELP KEEP LONG TERM RUNNING COSTS DOWN AND LOWER AND MAINTAIN STRESS LEVELS ON THEIR PRECIOUS HORSES.

ENDURO RUBBER MULCH IS MADE FROM 100% RECYCLED TYRES AND IS SIFTED THROUGH OUR STATE OF THE ART MAGNETIC SEPARATION EQUIPMENT TO REMOVE UP TO 99% OF ANY STEEL FRAGMENT.

THIS PROVIDES A CUSHIONING EFFECT IN THE ARENA, THEREFORE REDUCES JARRING AND IS VITAL TO THE HORSES FOOTING. EQUESTRIAN RUBBER MULCH MINIMIZES INJURIES BY REDUCING CONCUSSION SHOCK AND MUSCLE STRAIN. THE USE OF ENDURO RUBBER MULCH IS WELL ESTABLISHED FOR ARENA SURFACES.

ENDURO EQUESTRIAN RUBBER MULCH IS MIXED 2-1 WITH SAND PROVIDING A CUSHIONED SPRINGY SURFACE THAT DRAINS WELL.

EQUESTRIAN

MAINTANANCE, DUST, CONCUSSION, JARRING AND FATIGUE ARE THE MOST IMPORTANT THINGS TO CONSIDER WHEN WORKING WITH HORSES, AND ARE SO VITAL.

USING ENDURO RUBBER MULCH ENSURES YOUR HORSES WELL BEING!

ENDURO EQUESTRIAN RUBBER MULCH CREATES A CUSHIONING EFFECT WHICH SOFTENS THE BLOW TO THE HORSES LEGS, JOINTS, HOOVES AND JARRING . WE KNOW THE LESS STRESS TO THE LIMBS MEANS BETTER RESULTS WHERE IT GIVES THE HORSE CONFIDENCE, ESPECIALLY WHEN IT COMES TO JUMPING AND SHARP TURNING. THE EVEN BASE AND THE CONSISTANT GRADES OF ENDURO EQUESTRIAN RUBBER MULCH, DELIVERING HORSES MORE POWER AND STRENGTH TO HIND QUARTERS TO PUSH, JUMP AND TURN. THE COMBINATION MIX GIVES HIM A FIRM GRIP TO PUSH AWAY AND DOES NOT BOG HIM DOWN.

GOOD FOOTING IS SAFER FOR HORSES AND BOOSTS CONFIDENCE.

HOW DOES BAD FOOTING EFFECT HIM?

IF THE GROUND IS TOO HARD HE WILL SHORTEN HIS STRIDE TO MINIMIZE JARRING. THIS WILL MODIFY HIS JUMPING FORM TO AVOID THE STING OF LANDING. HARD FOOTING WILL ALSO STRESS HIS JOINTS. IF ITS TOO DEEP IT WILL STRAIN HIS SOFT TISSUE, TENDONS, LIGAMENTS AND MUSCLES. IF ITS SLIPPERY, HE WILL FEEL INSECURE AND THIS WILL MAKE HIM MOVE MORE CAUTIOUSLY. IF IT IS AN UNEVEN BASE, IT WILL INTERFERE WITH A CONSISTENT RIDE BY FORCING HIM TO COMPENSATE FOR LOW POINTS WHERE HE MAY INJURE HIMSELF.

EQUESTRIAN

MAINTENANCE

Regular maintenance is important especially if it is used regularly, it is important to keep your riding surface area at an even level, we advise that you use a leveling device with tines set 30mm above the base and a depth slide to the rear of a tractor, the width of the leveling tines to be 5cm or 500mm past the rear so you don't leave tyre tracks and cause rutting.

By doing this it will keep it fluffed up and aerated giving the arena an even air content and cushion effect.

It recombines the sand and rubber and keeps it working to its full potential.

Try to work your arena evenly and if you are jumping frequently it is best to move your jumps around to give it an even wear.

COVERAGE *(Guide Only)*

1 ton of Enduro arena mulch @ 50ml thickness will cover 100m²

Available in various colours and grades

AVAILABILITY

ENDURO RUBBER MULCH IS AVAILABLE DIRECT AND EXCLUSIVELY FROM RUBBER MULCH AUSTRALIA Pty Ltd.

ENDURO EQUESTRIAN MULCH IS PACKAGED IN 25 K BAGS OR 500K ON REQUEST.

PALLATIZED BAGS FOR BULK ORDERS WILL BE 500KL WEIGHT OF 1 PER PALLET (M3).

IT IS RECOMMENDED LARGE OR BULK ORDERS (SAY OVER 5 TON) BE PLACED 4/6 WEEKS BEFORE DELIVERY IS NEEDED.

TESTING

We stand by our product undertaking continuous R&D, testing and certification by the leading Australian authorities

- Scientific
- SMART APPROVED WATERMARK
- AND other reports are available upon request
